When to come back after acute kidney injury

Signs to watch for at home

Acute kidney failure (AKI)

You are on track

Keep to your plan

- For most people, kidney function returns to normal with treatment.[1]
- If your doctor told you to limit fluids, follow that advice.[1]
- Your urine is pale yellow because you drink enough fluids.[1]

See a doctor urgently

See a doctor within 24 hours

- You pass less urine than usual, or it stops.[1,2]
- You cannot keep fluids down.[1]
- You feel unwell while taking blood pressure tablets.[1]
- You have severe or ongoing vomiting or diarrhoea.[1]
- You have swelling in your legs, ankles or feet.[2]

Emergency

Go to the emergency department now, or call 997

- Your symptoms get worse.[1]

My next appointment and blood test
